

SEAL Training: VASCO Product Overview

Strong Authentication Market Overview and VASCO Product Offering.

ACQUIRED SKILLS & KNOWLEDGE

The "VASCO Product Overview" course begins with an explanation of the rationale and added value of strong authentication. The VACMAN® core authentication platform and DIGIPASS® family of authentication devices are introduced. You will become familiar with VASCO's VACMAN Controller backend API and VACMAN Middleware suite. The course will also give an in-depth overview of the entire range of the DIGIPASS end user authentication devices, which consists of more than 50 unique models.

MAIN TOPICS

- Strong authentication
- DIGIPASS Family
- VACMAN Middleware 3.0
- VACMAN Controller 3.6

OUR FORMAT

VASCO offers training courses, seminars, and workshops along with individual consulting services in IT Security to fit individual needs of our customers.

- Web-based e-Learning
- DVD: 1 DVD
- Classroom-based training courses
- Total duration: 4½ hrs.

OUR EXPERTISE

VASCO has over 15 years of extensive experience in the IT security and authentication market. Now we are proud to share this knowledge with our customers. Whether you would like to know more about the current security challenges and threats in e-Banking, e-Commerce, or Network Security, or if you need a more comprehensive explanation about your current implementation, VASCO is there to assist you.

ADDRESSED QUESTIONS

At the completion of the "VASCO Product Overview" e-learning course, you will be able to answer the following questions:

- What is strong authentication and do I need it?
- What are the elements of strong authentication?
- What are the business benefits of strong authentication?
- What solutions and products does VASCO offer?
- How can strong authentication be implemented?

TARGET AUDIENCE

The "VASCO Product Overview" training is ideally suited for Product Managers, Sales Professionals and Sales Engineers who will benefit from a better understanding of the entire VASCO product offering.

SEAL OFFERING

VASCO's Security Experts Academy & eLearning platform (SEAL) proudly hosts a worldwide community of security professionals. As a security company, we consider it our duty to keep up with the current and emerging IT security trends and online attacks, and spread this knowledge to our customers, partners, and anybody who needs our advice.

OVERVIEW OF THE VARIOUS MODULES

VASCO Product Overview

Ideally suited for Sales Managers and Product managers who would like to learn the VASCO product line.

VASCO Product Details

Provides Product Managers and Engineers with detailed review of the VASCO product line.

Security Overview Training

Security Overview training provides a good introduction to anyone who is new to the security industry, offering a high level overview of the most important security topics.

Web Security In-Depth Training

Ideally suited for IT professionals who manage web servers on a daily basis or Web Developers who wish to learn how to secure websites and web servers.

PKI In-Depth Training

Focuses on design, setup, deployment and management of a Public Key Infrastructure (PKI).

Certified Ethical Hacking

Certified Ethical Hacking equips you with the necessary knowledge to attack a security system on behalf of its owner, seeking vulnerabilities that a malicious hacker could exploit using the same methods as your less ethical counterparts.

Hacking and Penetration Testing

This course will teach students how to attack a security system on behalf of its owner for vulnerability and risk analysis, simulating the same threats as presented by potential intruders.

Digital Forensics

After having completed this course, students will be able to obtain the necessary digital evidence after a Computer Forensic Incident, allowing them to perform an in-depth analysis of the incident and present the obtained data.

Content Security

After completion of this course, participants will have the necessary background knowledge on Content Security, including viruses, malware and critical defense mechanisms. The participants will be equipped with the knowledge to make informed decisions when implementing virus or malware defense systems.

eBanking Fraud Schemes

Students who have completed this course will have a good understanding of common online banking attacks and different solutions available to combat such attacks.
