- How can you calculate your ROI when deploying a PKI solution?
- How would you design a PKI?

TARGET AUDIENCE

This course is ideally suited for IT professionals who want to be able to successfully design, setup, deploy and manage a PKI.

SEAL OFFERING

VASCO's Security Experts Academy & eLearning platform (SEAL) proudly hosts a worldwide community of security professionals. As a security company, we consider it our duty to keep up with the current and emerging IT security trends and online attacks, and spread this knowledge to our customers, partners, and anybody who needs our advice.

OVERVIEW OF THE VARIOUS MODULES

VASCO Product Overview

Ideally suited for Sales Managers and Product managers who would like to learn the VASCO product line.

VASCO Product Details

Provides Product Managers and Engineers with detailed review of the VASCO product line.

Security Overview Training

Security Overview training provides a good introduction to anyone who is new to the security industry, offering a high level overview of the most important security topics.

Web Security In-Depth Training

Ideally suited for IT professionals who manage web servers on a daily basis or Web Developers who wish to learn how to secure websites and web servers.

PKI In-Depth Training

Focuses on design, setup, deployment and management of a Public Key Infrastructure (PKI).

Certified Ethical Hacking

Certified Ethical Hacking equips you with the necessary knowledge to attack a security system on behalf of its owner, seeking vulnerabilities that a malicious hacker could exploit using the same methods as your less ethical counterparts.

Hacking and Penetration Testing

This course will teach students how to attack a security system on behalf of its owner for vulnerability and risk analysis, simulating the same threats as presented by potential intruders.

Digital Forensics

After having completed this course, students will be able to obtain the necessary digital evidence after a Computer Forensic Incident, allowing them to perform an in-depth analysis of the incident and present the obtained data.

Content Security

After completion of this course, participants will have the necessary background knowledge on Content Security, including viruses, malware and critical defense mechanisms. The participants will be equipped with the knowledge to make informed decisions when implementing virus or malware defense systems.

eBanking Fraud Schemes

Students who have completed this course will have a good understanding of common online banking attacks and different solutions available to combat such attacks.
