

SEAL Training: VASCO Certified Ethical Hacking

Replication of Real-Life Hacker Attacks to Determine System Vulnerabilities

ACQUIRED SKILLS & KNOWLEDGE

The “VASCO Certified Ethical Hacking” course will teach students how to scan, test, hack and secure their own systems. Intensive lab demonstrations will give each student an in-depth knowledge and practical experience using their existing security system. The course will provide an understanding of how perimeter defenses work and will then guide students through scanning and attacking their own networks to determine the current risks.

MAIN TOPICS

- Intrusion Detection
- Policy Creation
- Social Engineering
- DDoS Attacks
- Buffer Overflows
- Virus Creation

OUR FORMAT

VASCO offers training courses, seminars, and workshops along with individual consulting services in IT Security to fit individual needs of our customers.

- Web-based e-Learning
- DVD: 2 DVDs
- Total duration: 13 hrs.

OUR EXPERTISE

VASCO has over 15 years of extensive experience in the IT security and authentication market. Now we are proud to share this knowledge with our customers. Whether you would like to know more about the current security challenges and threats in e-Banking, e-Commerce, or Network Security, or if you need a more comprehensive explanation about your current implementation, VASCO is there to assist you.

ADDRESSED QUESTIONS

At the completion of the “VASCO Certified Ethical Hacking” e-learning course, you will be able to answer the following questions:

- Footprinting: explain revisiting reconnaissance
- Explain the following hacking terms: Scanning/Enumeration/ System Hacking/Trojans and backdoors/ Sniffers
- Evading methods for IDS, firewalls, and honeypots
- What are the access methods of viruses and worms

TARGET AUDIENCE

The “VASCO Certified Ethical Hacking” course equips you with the necessary knowledge to attack your own security system seeking vulnerabilities that a hacker could exploit in a real-life situation.

SEAL OFFERING

VASCO's Security Experts Academy & eLearning platform (SEAL) proudly hosts a worldwide community of security professionals. As a security company, we consider it our duty to keep up with the current and emerging IT security trends and online attacks, and spread this knowledge to our customers, partners, and anybody who needs our advice.

OVERVIEW OF THE VARIOUS MODULES

VASCO Product Overview

Ideally suited for Sales Managers and Product managers who would like to learn the VASCO product line.

VASCO Product Details

Provides Product Managers and Engineers with detailed review of the VASCO product line.

Security Overview Training

Security Overview training provides a good introduction to anyone who is new to the security industry, offering a high level overview of the most important security topics.

Web Security In-Depth Training

Ideally suited for IT professionals who manage web servers on a daily basis or Web Developers who wish to learn how to secure websites and web servers.

PKI In-Depth Training

Focuses on design, setup, deployment and management of a Public Key Infrastructure (PKI).

Certified Ethical Hacking

Certified Ethical Hacking equips you with the necessary knowledge to attack a security system on behalf of its owner, seeking vulnerabilities that a malicious hacker could exploit using the same methods as your less ethical counterparts.

Hacking and Penetration Testing

This course will teach students how to attack a security system on behalf of its owner for vulnerability and risk analysis, simulating the same threats as presented by potential intruders.

Digital Forensics

After having completed this course, students will be able to obtain the necessary digital evidence after a Computer Forensic Incident, allowing them to perform an in-depth analysis of the incident and present the obtained data.

Content Security

After completion of this course, participants will have the necessary background knowledge on Content Security, including viruses, malware and critical defense mechanisms. The participants will be equipped with the knowledge to make informed decisions when implementing virus or malware defense systems.

eBanking Fraud Schemes

Students who have completed this course will have a good understanding of common online banking attacks and different solutions available to combat such attacks.
